

Antistatic agent KC3090

Product Description: The antistatic agent KC3090 is a non-ionic surfactant that can significantly reduce the surface resistance of the coating so that the coating resistance is reduced from 10^{14} - $10^{16}\Omega$ to 10^8 - $10^9\Omega$, the antistatic is efficient and durable, and the spray can prevent the establishment of the DC potential and can obtain a uniform thickness of the coating. Suitable for compatibility with resins, it is suitable for eliminating surface static electricity in various types of powder coatings.

1) Appearance: White or light-yellow flake or powder.

2) Recommended Use: For internal extrusion, and the dosage is 0.3%-1%.

3) storage: Store in a cool place, keep it airtight in a container, and store it in a dry and ventilated place. Avoid contact with skin and eyes. Avoid dust and aerosol formation. Provide suitable exhaust equipment in places with dust. General fire prevention measures.

Notes:

Avoid directly touch with skin and eyes; Wear protective clothing and goggles;
Wash with water after the operation.
